(Aug 2004 – Sept 2005)

Worked as a Programmer in ICC Soft, A Division of ICC (Pvt.) Ltd.

My major responsibilities at ICC Soft are:

- Designing GUI's and development.
- Perform Programming tasks in accordance to Standards.
- Database Design and Development

Major Projects

Project: WinBid Plus**Role:** Software Engineer, Database Designer.

WinBid is an enterprise application designed to automate, manage and control the entire bidding process of an organization. The solution facilitates proposal managers, project managers and other decision makers in performing, managing and coordinating their efforts for project bidding. It also provides budget and cash flow for proposals that have been converted into the projects in the later stage. It also has complete administrative features that are required to manage the users, data and the proposal archives. My role in Winbid Development Team is DBA & Software Engineer. I have worked on different layers of this project like, GUI, Web Services, DAL, DAP and Schema. I am also working on third party tool (Dev Express).

Development Language &Tools:

Microsoft Visual Studio.Net 2008, MS SQL Server 2005, Web Services, SQL Server Reporting Services, MS Application Blocks

Project: Descon Online, Timesheet and Phonebook**Role:** Software Engineer, Database Designer.

This portal was developed for DEL employees and higher management to monitor the Organizations Upcoming ongoing events, News, Latest Announcements and Timesheet. All the employees have own profile area where they update their personal profiles with images etc, it's also generate up-to-date phonebook at organizational level.

Development Language &Tools:

Microsoft Visual Studio.Net 2008, MS SQL Server 2008, AJAX Framework, Extjs Javascripts

Project: LDA Computerized Balloting 2008**Role:** Software Engineer, Database Designer.

This project was developed for Lahore Development Authority, which conduct computerized balloting of plots in 2008, to make it more trustable and reliable we are using some complex algorithm in it like hashing and some low level APIs for random plots allocations. It's also have very rich reporting engine for different types of reports.

Development Language &Tools:

Microsoft Visual Studio 6.0, MS SQL Server 2000, Crystal Report 10, MS Application Blocks

Project: CIS (College Information System)
Role: Software Engineer, Database Designer.

College Information System (CIS) is a powerful resource for managing college/campus information such as student inquiries, student registrations, student admissions, student family background, student medical history, student educational background, fee management, class management, event management, exam management, result management and many more. CIS is a client/server application with central database hosted at the head office giving more security to data and information.

Development Language & Tools:
Microsoft Visual Studio.Net 2005, MS SQL Server 2000

Project: AVALANCHE (A Telecommunication Reporting Module)
Role: Software Engineer, Database Designer.

Avalanche is a Jordan based Telecommunication Company. Purpose of this project is to see load of SMS generated by different mobile users. Project consists of two major parts one is data transferring agent (DTA) and second is reporting system (Enterprise Reports). Where DTA is mobile log reader and transfers data from machine generated file to database. Whereas Enterprise Reports is to show data obtained by DTA in formatted style.

Development Language & Tools:

Role: Software Engineer, Database Designer.

Distributor Management System was developed for "FRIEND TRADING COMPANY". DMS includes Inventory, Accounts modules.

Development Language & Tools:
Microsoft Visual Studio 6.0, MS SQL Server 2000, Visual Source Safe, Crystal Report 8.5

Project: W1M (Weight 1 Minute) (www.weight1minute.com)

Role: Web Developer, Database Designer.

W1M is designed to be an information portal focusing on weight loss and fitness, with related news articles. The basic purpose of this site is to educate people about weight, calories, fitness, health, and how all of these interrelate to each other. People can subscribe to a weight loss program. Users should be able to keep track of their progress, with charts, graphs, and a comparison to the USDA guidelines. In addition, users should be able to add additional information based on their exercise level. Beside this, clients should be able to analyze their own recipes, based on the ingredients used.

Development Language & Tools:

PHP, Java Script, CSS, RSS, My SQL, MS OLAP DB Designer.

Project: Some PHP Projects

Role: Web Developer, Database Designer.

I have developed several Dynamic Web Sites using PHP as my individual projects are mentioned below:

www.cpmcollege.edu.pk

www.cbp.gov.pk

www.medicalinformationtech.com

www.tmg.com.pk

www.thebridge.net.pk

www.bloodforlife.com.pk

www.fairtradellc.com/beta

www.worldsportsraze.com/beta

www.samtradingcorp.com/coolblue

www.digital-bs.com

www.jssofttech.com

www.languagebasics.com

Development Language & Tools:

PHP, Java Script, CSS, My SQL, MS OLAP DB Designer.

Other Experience (*During BIT*)

Project: Army Information System

Role: Programmer, GUI Designer

Develop the information system of Army as a final project. It manages the information of an army unit that includes Officer Pay, JCO's pay and personal records of a soldier.

Development Language & Tools:
